Welcome to BTS

Enabling people to shape the digital future

If you're passionate for technology and want to contribute to drive the digital transformation, Barcelona Technology School is your place.

The digital ecosystem in Barcelona is now warmer than ever. The strategic alignment of the government, the industry and educational institutions like BTS, are mixing the best ingredients to boost the European capital of innovation.

The result of Barcelona's digital strategy is excellent: international companies are landing in Barcelona to relocate their digital and tech headquarters and open professional opportunities for those who are ready.

My Digital Impact

Having a purpose for professional happiness

A Team of mentors will help you to define your own purpose according to what you love, what you are good at, what can you be paid for and how you can improve the world with such amazing skills.

This ensures you focus your energy on a job you really love, which is the best way you can drive a great digital impact.

IKIGAI

We help Barcelona Technology School students to achieve their professional goals and find happiness in life doing what they love the most.

This is driven by a Japanese concept called IKIGAI, which describes the secrets for a long and meaningful life. To achieve this goal you have to identify your reason for being and your own purpose.

BTS will help you to find your IKIGAI and a Team of mentors will advise you during this exciting journey that will boost your digital impact on the society.

My Digital Impact

Mentors

BTS mentors are generous people that believe in the power of sharing. They will be happy to offer you their vision and wide experience as digital leaders in top global tech companies. Get advice from digital sages that will help you to drive your purpose and develop a great career in the digital industry.

Master in Digital Transformation Leadership

Lead the change that is transforming entire organizations into digital ecosystems.

Master in Digital Transformation Leadership

Digital Transformation requires leaders able to understand disruptive technologies, adopt innovation and manage uncertainty in a constant changing environment. To achieve this goal, corporations need professionals able to shape the digital future with interdisciplinary skills such as:

Contents

Master in Digital Transformation Leadership

Digital Transformation

The aim of this module is to understand how the digital transformation is modifying the economy. At the end of the subject, students will be able to build digital business strategies.

Modern Finances & Budgeting

Students will learn to create a financial plan appropriate to the needs of agile companies that operate in digital environments.

Agile

The students will immerse in the Agile mindset by experimenting the Agile management practices. At the end of this subject they will be able to practice Scrum, understand Kanban, develop and idea from Vision to Deployment from an Agile perspective and define requirements with User Stories.

Lean Management

After this module, students will be able to apply the “lean” model to business management, optimizing the creation of value with the necessary resources.

Change Management

The students will develop skills to manage the change in the digital economy and adapt the organization to these needs. They will face the needs of change management from the vision of individual change, the change in teams and in the organizations.

Legal Tech

Students will work on the impacts of digital disruptions on regulations in order to advance legal requirements in digital-based corporations.

Digital Marketing

Students will learn to develop digital marketing strategies that permit generate awareness and visibility for a digital product, attract and retain users and understand how to optimize each phase of the conversion funnel.

Disruptive Technologies

The students will discover which technologies are transforming economic models and what are their impacts in different industries.

Innovation

Students will work on the necessary skills for the generation of innovation, understanding their role in the framework of digital transformation.

Advanced IT Management

After this module the students will be able to manage IT departments in organizations that use technology intensively.

Data-driven Business

During this module you will understand the different business models that arise from the data, and how the data generated by digitalization can be used to solve real problems and improve decision making by increasing profits and/or reducing operating costs and fraud.

Management and Leadership

The students will work on the different models of leadership and management to operate successfully in the digital economy.

Cyber Security

The objective of this module is to understand the risks and vulnerabilities of a digital project and how to properly protect them. Students will learn the basic principles of security, including confidentiality, integrity and availability.

Entrepreneurship

Students will learn to shape opportunities and lead Teams to create economic and social value. They will create and develop business models for start-ups, based on customer development and continuous validation, managing financial metrics and dealing with investors.

Digital Talent and Culture

Students will learn to manage the talent of an organization that operates in digital environments and to prepare a suitable corporate culture that ensures the new structural needs that arise when adopting digital business models.

Project

During the program students have to work on a final project with the aim to develop a digital transformation strategy for a company that wants to operate successfully in digital environments.
